

Your business or organisation has decided to move ahead with an integration project and has chosen the technologies needed to support a successful outcome.

But the big questions you need to ask (and have answered) are: 'Are we ready? How mature are our approaches? And how do we move forward?'

adaptiv.assess is a maturity workshop which takes you through an in-depth evaluation of your technology environment. The primary objective of **adaptiv.assess** is to assess whether you're ready for an integration platform refresh to support your digital transformation initiatives.

To deliver real value to your business and customers, our maturity workshop guides you through the process of ensuring equal attention is paid to your people, how they work, and then finally - the application of technology.

Having a clearly defined process for delivering APIs in an API Strategy is also important. Teams armed with procedures for each stage of the lifecycle will be able to deliver faster and sustain velocity when key staff leave the team and new team members join.

"As part of the **adaptiv.assess** workshop, Nikolai led us through a co-design process where we got everything reviewed, documented and squared up before we started development. We ended up with a comprehensive blueprint for success."

Micky Heath, Project Manager, Victoria University of Wellington

What?

Held over several weeks, the purpose of this 3 to 5 day maturity workshop is to establish the value and limitations of your current approach, facilitate discussions around definition roles and responsibilities, processes and future technology roadmaps. Workshops are facilitated by Adaptiv's principal integration architect and principal consultant, and include interviews with stakeholders, documenting and confirming details utilising whiteboards and collaboration tools such as Microsoft OneNote or Confluence.

When?

We recommend **adaptiv.assess** as the next step after you have completed an **adaptiv.educate** workshop.

Who?

Development Leads, IT Managers, Enterprise Architects, technology users.

What will you walk away with?

By the end of this workshop, you will understand the capabilities and shortcomings of your current integrations, where you want to be in the future, and what you need to do to get there. You will also have an estimate from us of the costs involved and project timeline.

Cost:

\$5,500-\$11,000 plus gst.

About Adaptiv Integration

Formed in 2010, we're a New Zealand owned and operated consulting partner invested in helping you to leverage and extend the value of your existing business applications, not selling you new ones.

We provide world-class integration and cloud technology consulting and execution services. With over a decade of experience in delivering small- and large-scale integration for the enterprise, we deliver clear and measurable value to our clients' bottom-line.

Services

adaptiv.**align**

A 3-hour strategic alignment meeting with organisational C-level stakeholders to introduce Adaptiv Integration solutions, services and capabilities.

adaptiv.**educate**

A half-day technical product briefing to discuss available and recommended technologies.

adaptiv.**assess**

A 3 to 5-day maturity workshop to establish the value and limitations of your current approach, facilitate discussions around definition roles and responsibilities, processes and future technology roadmaps.

adaptiv.**verify**

A 2 to 3-day workshop is designed to prove that the selected technologies and approach will deliver the concrete outcomes required by the business.
