adaptiv.educate

The strategic decision has been made. The business is moving ahead with an integration project to drive significant value from disparate but critically important applications. But the question is: 'What technologies and approach are best suited for your needs?'

Challenges

You're overloaded with information on technology platforms, API management, and how to enforce consistency and security for your line-of-business, mobile and legacy applications, website and new systems. You've downloaded and read Microsoft whitepapers and watched the videos. But where to from here?

Solution

adaptiv.educate is a half-day technical product briefing designed to provide a deep dive into the technology platforms you are considering (and any others we feel have been overlooked).

Ideal for IT Managers, Development Leads, Architecture Teams, Heads of Applications, CIOs and CDOs.

Outcome

By the end of the session you will understand what each of the technology platforms you are considering is capable of, the respective business benefits, potential cost savings and more.

adaptiv.educate

We recommend **adaptiv.educate** as the next step once you have made the decision to leverage the value of integration and have chosen or shortlisted technologies.

A partner you can trust

We're a New Zealand owned and operated consulting partner invested in helping you to leverage and extend the value of your existing business applications, not selling you new ones.

We provide world-class integration and cloud technology consulting and execution services.

Value you can count on

With over a decade of experience in delivering small- and large-scale integration for the enterprise, we add clear, repeatable and measurable value to our clients' bottom-line.

That's why we are the partner of choice for some of New Zealand's leading organisations.

Confident decision-making

This workshop will provide you with the in-depth knowledge and understanding required to make an informed and confident technology recommendation to the business decision makers in readiness to proceed to a detailed assessment of your environment and objectives.

adaptiv.educate

Services

adaptiv.educate is the second in a series of four workshops designed to help you to undertake your project with confidence, establish desired business outcomes, define future goals and offer proof of value to stakeholders.

adaptiv.**align**

A 3-hour strategic alignment meeting with organisational C-level stakeholders to introduce Adaptiv Integration solutions, services and capabilities.

adaptiv.**educate**

A half-day technical product briefing to discuss available and recommended technologies.

adaptiv.**assess**

A 3 to 5-day maturity workshop to establish the value and limitations of your current approach, facilitate discussions around definition roles and responsibilities, processes and future technology roadmaps.

adaptiv.**verify**

A 2 to 3-day workshop designed to prove that the selected technologies and approach will deliver the concrete outcomes required by the business.

Adaptiv and Microsoft

The cloud is changing the way we build and run software, but not all software will be in the cloud or in a single cloud.

Azure Integration Services enable you to build new integrated solutions in the cloud that leverage resources on premises and cross-cloud. Services such as Functions, Logic Apps, API Management, and Service Bus provide you with the tools you need to integrate your existing applications and services and give you the scale and efficiency of Azure to run and manage them. This, combined with Azure DevOps, provides solid managed Continuous Integration (CI) and Continuous Deployment (CD) for your applications.

Adaptiv is proud to be a Microsoft Gold Partner. We hold the highest possible levels of competency for Azure integration, development and DevOps.
