

adaptiv.assess

You're ready to make your move. Your business or organisation has agreed to undertake an integration project and has chosen the technologies needed to support a successful outcome. But the next big questions are: 'Are we ready? How mature are our approaches? And how do we move forward?'

Challenges

How do you know if you're ready for an integration platform refresh to support your digital transformation initiatives?

Do you have a clearly defined API Strategy? And how will you manage key staff departures and handing over knowledge to new people?

Solution

adaptiv.assess is a 3-5 day maturity workshop design to take Development Leads, IT Managers, Enterprise Architects, and technology users through an in-depth evaluation of your technology environment.

Outcome

By the end of this workshop, you will understand the capabilities and shortcomings of your current integrations, establish where you want to be in the future, and what you need to do to get there.

You will also have an estimate from us of the costs involved and a project timeline.

adaptiv.assess

We recommend **adaptiv.assess** as the next step after you have completed an **adaptiv.educate** workshop.

A partner you can trust

We're a New Zealand owned and operated consulting partner invested in helping you to leverage and extend the value of your existing business applications, not selling you new ones.

We provide world-class integration and cloud technology consulting and execution services.

Value you can count on

With over a decade of experience in delivering small- and large-scale integration for the enterprise, we add clear, repeatable and measurable value to our clients' bottom-line.

That's why we are the partner of choice for some of New Zealand's leading organisations.

Confident decision-making

Clarify the forward path with defined and fully documented project roles, responsibilities, and processes.

With a clear understanding of the value and limitations of your current approach behind you, you will be able to plan a successful technology roadmap for the future.

Services

adaptiv.assess is the third in a series of four workshops designed to help you to undertake your project with confidence, establish desired business outcomes, define future goals and offer proof of value to stakeholders.

adaptiv.**align**

A 3-hour strategic alignment meeting with organisational C-level stakeholders to introduce Adaptiv Integration solutions, services and capabilities.

adaptiv.**educate**

A half-day technical product briefing to discuss available and recommended technologies.

adaptiv.**assess**

A 3 to 5-day maturity workshop to establish the value and limitations of your current approach, facilitate discussions around definition roles and responsibilities, processes and future technology roadmaps.

adaptiv.**verify**

A 2 to 3-day workshop designed to prove that the selected technologies and approach will deliver the concrete outcomes required by the business.

Adaptiv and Microsoft

The cloud is changing the way we build and run software, but not all software will be in the cloud or in a single cloud.

Azure Integration Services enable you to build new integrated solutions in the cloud that leverage resources on premises and cross-cloud. Services such as Functions, Logic Apps, API Management, and Service Bus provide you with the tools you need to integrate your existing applications and services and give you the scale and efficiency of Azure to run and manage them. This, combined with Azure DevOps, provides solid managed Continuous Integration (CI) and Continuous Deployment (CD) for your applications.

Adaptiv is proud to be a Microsoft Gold Partner. We hold the highest possible levels of competency for Azure integration, development and DevOps.
